

MindManager for Windows

MindManager for Windows® gives individuals and organizations a better way to capture ideas, present information, analyze decisions, and manage projects using interactive mind maps. Whether you're brainstorming, creating a presentation for a big client, seeking approval for a business plan, or validating project requirements, MindManager's visual approach gives you and your team the clarity needed to succeed. MindManager for Windows and MindManager for Mac® are both included in Mindjet MindManager.

MindManager maps show the big picture and the details, all in a single view.

Better Brainstorming

MindManager works like a virtual whiteboard, and its flexibility encourages more creative thinking. Brainstorm collaboratively with organized maps that you can save, share, and present—unlike sloppy flipcharts and sticky notes. With MindManager, you can quickly capture ideas, then just drag and drop to organize them into themes. Use guided brainstorming to start with a clearly defined challenge to increase the quality and quantity of ideas your team generates. Discover new ideas by using sets of words, images, and question cards that spark the brainstorming process, then categorize, sort, and refine the results.

Efficient Project Planning and Management

MindManager helps you keep teams in alignment on the decisions and tradeoffs that determine if a project will meet expectations and deadlines, giving you visibility into every aspect of your project. Create project plans quickly using MindManager templates, pre-built map topics, and simple task creation tools. Add details and resource assignments, edit due dates, and update the priority of deliverables directly in your project map. Switch easily between map and Gantt views to validate objectives, schedules, and resources, and then optionally export to Microsoft Project®.

Smarter Business Planning

Gather input and gain alignment for key business decisions by mapping out all aspects of business plans in a single view. MindManager provides deep capabilities for organizing information that drives critical business processes like decision-making on budgets, forecasts, and strategies. Use integrated 2x2 analysis to chart strengths, weaknesses, and other project attributes. Define and apply formulas to topics throughout your map, so you can instantly see the results of changes to budgets and forecast calculations. Unlike conventional spreadsheets, you can easily drag and drop content or apply filters to quickly perform visual “what-if” analyses, and instantly see the impact of those changes. You can even use formulas with multiple functions and operators. Data is easy to edit and much easier to present and explain than in regular spreadsheets.

Key Capabilities:

Choose the Best View

Lay out ideas, information, and projects in a variety of visual formats, including information maps, outlines, Gantt charts, 2x2 analysis views, organization charts, and indexed content lists.

Add Content and Context

Add hyperlinks, attachments, notes, images, and spreadsheets to provide additional levels of detail. Easily drag and drop files from your desktop, Windows Explorer, or online file folders into your map. You can also drag and drop emails, contacts, tasks and appointments from Microsoft Outlook. Use the embedded browser to view attachments, notes and websites in MindManager.

Give Persuasive Presentations

Showcase ideas and increase engagement using MindManager's automated presentation view or customizable slideshows. With MindManager's dynamic presentations, you can easily tailor the level of details presented for each audience and capture critical feedback directly in the presentation. Once your presentation is complete, optionally export to PowerPoint for final delivery.

Drive Decision-Making

Use 2x2 analysis views, such as SWOT charts, to clarify strategic decisions. Numerical calculation and formula functions let you instantly analyze the results of changes to budgets and forecasts.

Stay Current

Mindjet offers several options for customers to automatically receive new feature updates. For individuals, MindManager PLUS is an optional one-year subscription that provides all new feature releases and an online account for anytime, anywhere access to your maps, plus access to Mindjet Mobile apps. Mindjet Software Assurance (MSA) plans give organizations access to a premium level of support, as well as new feature releases.

Supported Operating Systems

- Microsoft Windows 8, 32-bit and 64-bit
- Microsoft Windows 7, 32-bit and 64-bit (includes Service Pack 1, Feb., 2011 release)

System Requirements

- IBM® or compatible Intel® Pentium® processor, (1 GHz or greater)
- 2 GB RAM or greater
- 830 MB disk space
- SVGA (1024 x 768/16-bit color or greater)
- Microsoft .NET 4.0 or higher

Additional Requirements to Use Certain Features

- Microsoft Office® Professional 2003, 2007, 2010, or 2013 (32-bit and 64-bit)
- Microsoft Project 2003, 2007, 2010, or 2013 (32-bit and 64-bit)
- Microsoft Internet Explorer 8.0 or greater
- Mozilla® Firefox® 9.0 or greater
- Google® Chrome™ 16.0 or greater
- Adobe® Acrobat® 9.2 or greater
- Adobe Flash® Player 10 or greater
- Broadband Internet Connection
