

WinZip® 19.5 Enterprise

Product Datasheet

For years, users have turned to WinZip to simplify file sharing and protect critical information.

You told us you needed more, and we listened. Now there's a WinZip solution designed to meet your specific needs: WinZip 19.5 Enterprise.

WinZip 19.5 Enterprise supports key objectives, including improving employee productivity and enabling secure collaboration, while giving IT administrators the tools they need to manage sharing and maintain security.

By combining proven compression and encryption with secure email, and powerful file management features, WinZip 19.5 Enterprise offers the perfect solution.

WinZip 19.5 Enterprise Benefits

- **Increase power:** Extensive IT controls let administrators manage access to cloud storage and social media, enforce AES encryption and set password protocols.
- **Boost workflow:** The comprehensive guide includes detailed information on how to deploy and optimize WinZip 19.5 Enterprise.
- **Protect your data:** The Enterprise Edition offers powerful compression, encryption, sharing and backup tools with support for SharePoint and Amazon S3. Offer employees easy, secure file sharing across email, SharePoint, Amazon S3, and IT-approved cloud and social media accounts. WinZip 19.5 also ensures you meet U.S. government requirements for FIPS 140-2 encryption, both at rest and during exchange.
- **Streamline file management:** Now employees can browse, copy, move and delete files within WinZip. Selecting local, network and cloud files to zip is easier, and encryption and conversion options can be applied as needed to individual files.
- **Faster access:** WinZip Express for Office, Explorer, SharePoint and Photos give users faster access to commonly used features, without launching WinZip.
- **Enforce security:** The powerful Courier 6.0 integrates with Microsoft Outlook 2007, 2010, 2013 (32- and 64-bit) and webmail, including Yahoo! Mail, Outlook.com, Gmail and Zoho to zip attachments into smaller, manageable packages that are delivered faster. Courier 6.0 also offers 128-bit or 256-bit AES encryption and wipes temp files to ensure the security of encrypted attachments.
- **Work productively:** Employees can work on almost any device with the touch-friendly design of WinZip 19.5. The layout can change automatically from tablet to notebook mode when used on dual-use computers.
- **Access Virtual Drives:** Now IT administrators can use WinZip to open a Virtual Image file, viewing the content and extracting files to another location. WinZip 19.5 includes support for VHD files, including NTFS compressed files and VMWare files.
